TUTORIAL
PREMIERE PRO TEMPLATE

Installing and Configuring the Template

1
From the «Graphics» Menu and Select «Install Motion Graphics Template».

2
Select and Install Templates.

3
In the «Essential Graphics» Panel, select Title.

4
Add a Template to the «Timeline Panel» and Select it.

5
Go to the «Edit» Menu Item and Configure the Template.

1. To install the template in Premier Pro, go to menu «Graphics» > «Install Motion Graphics Template».

2. In the window that opens, specify the folder with templates. Select the desired template and double-click to install it.

3. In the «Essential Graphics» panel that appears, select the installed template.

4. Add a template to the «Timeline Panel» and select it.

5. Go to the «Essential Graphic» > «Edit» panel and make changes to the template.
